

Product code : 34011A

## PRIMER 2001

### DESCRIPTION

PRIMER 2001 is a translucent solution containing isocyanates specially developed to improve the adhesion of polyurethane and hybrid sealants on a wide variety of building substrates.

### ADVICE

See also material safety data sheet

### AREAS OF APPLICATIONS

PRIMER 2001 is intended for professional use as an adhesion promoter for polyurethane and hybrid sealants on most building substrates such as concrete, aluminium, wood, glass and certain plastics.

Also acting as a porosity blocker on materials such as concrete or wood, it reduces or even avoids the bubbling generated by curing in difficult conditions.

### TECHNICAL DATA

### INSTRUCTIONS FOR USE

Refer to product's technical data sheet.

The technical data contained herein is based on our present knowledge and experience and we cannot be held liable for any errors, inaccuracies, omissions or editorial failings that result from technological changes or research between the date of issue of this document and the date the product is acquired. Before using the product, the user should carry out any necessary tests in order to ensure that the product is suitable for the intended application. Moreover, all users should contact the seller or the manufacturer of the product for additional technical information concerning its use if they think that the information in their possession needs to be clarified in any way, whether for normal use or a specific application of our product.

Our guarantee applies within the context of the statutory regulations and provisions in force, current professional standards and in accordance with the stipulations set out in our general sales conditions.

The information detailed in the present technical data sheet is given by way of indication and is not exhaustive. The same applies to any information provided verbally by telephone to any prospective or existing customer.
